

Client Selection.

*In the form of a Cover Page for
your Client Documentaiton.*

Surf the Web in search for a client.

Choose a client whose Website DOES NOT have a shopping cart feature. Some ideas include: a museum, a restaurant, an artist, a tourist attraction, a brewery, a state park, a salon, a photographer, a theater, etc.

When choosing your client, be certain to choose one whose website is not too large content-wise, but that has enough good written content, and has bad structure and design and thus is in dire need of an architectural and aesthetic overhaul.

Examples of this are:

 *Cranky Press Man*

 *Arbuckle Parks & Recreation District*

Don't worry if the site has good existing photos or graphics, you will be creating or searching for your own graphics and imagery. Similarly, you will be able to create and eliminate written content.
